

BUILT-UP ROOF SYSTEM

MODIFIED BITUMEN SYSTEM

SINGLE-PLY SYSTEM

LIQUID APPLIED SYSTEM

METAL ROOFING SYSTEM

MODIFIED BITUMEN SYSTEM

Modified bitumen systems combine the advantages of built-up roofing with the ease of application of a single-ply system. Bitumen is reinforced with fibre glass or polyester for added durability, and manufactured into sheets or rolls for ease of application.

 Composite Wall Panels, Metal Wall & Roof
 Cladding, Louvres, Interior Glazing

The advantages of the modified bitumen systems are:

- Durable in extreme weather conditions
- Easy to repair
- Factory-manufactured to ensure quality control
- Expand or contract with the movement of the building
- Variety of surfaces that resist oxidation and damage from UV rays
